

Technical inspection for Accommodations platform

REFERENCES FOR ENGINEERING & CONSULTANCY

June 2017

Customer: Maersk Oil Integrity & Reliability

The Project

To ensure timely, well prepared & cost efficient refurbished or upgraded accommodations, Seacabin have prepared an overview and maintenance strategy.

Root cause: Maersk Oil wants to know their future maintenance costs on the North Sea accommodations, especially on building construction and furniture related to the accommodation.

We assist on

- Preparation for offshore survey with summary of material drawings and information for use in the technical investigation
- Technical assessment and visual inspection offshore
- Creation of a report for the technical review
- Creation of a strategic plan, including price estimates for replacement and renovation of individual structures, so that our customer can see the planned costs for the next xx years.
